

What is a Capstone Project?

The objective of the Capstone Project is to gain practical experience in end-to-end problem-solving with machine learning tools and techniques and learn to implement and select the most suitable analytical methods for business needs. Also, understand the trade-offs involved in real-world problem-solving while enhancing your presentation and report writing skills.

Capstone Project Grading Criteria:

The Capstone Project is worth 100 points and is divided into 3 parts with 4 assessment deliverables as follows:

- Milestone Submission - 20 Points
- Final Submission - 40 Points
- Live Presentation - 40 Points
 - Live Presentation Slide Deck - 10 Points
 - Live Presentation with the evaluator - 30 Points

Difference Between Milestone Submission & Final Submission and Live Presentation Details:

Milestone Submission

Focus:

- Initial Exploration: Conduct preliminary data analysis to identify patterns.
- Initial Insights: Extract early insights using univariate, bivariate analysis, or unsupervised learning (e.g., clustering).
- Modeling Techniques: Experiment with different modeling techniques and evaluate their performances.

- **Implementation Feasibility:** Assess potential challenges, benefits, and expected outcomes of various solutions.

Submission Should Include:

- Data exploration using relevant techniques.
- Key insights pertinent to solving the problem.
- Results from initial predictive models with performance comparisons.
- A well-informed perspective on the most effective final modeling techniques.

File Submission Formats:

- Full Code version project: HTML format
- Low Code version project: PDF format
 - Report templates are not provided for the Capstone Project in order to encourage learners to apply their knowledge and insights gained over the past 11 weeks of the program while structuring their project submission based on their own understanding of the domain. However, a Sample Project is available within the course for reference while preparing the Capstone Project submission.

Final Submission

Focus:

- **Key Takeaways:** Summarize findings from the milestone phase.
- **Refined Model:** Present and justify the final model choice.
- **Implementation Recommendations:** Provide actionable insights, expected benefits, and potential challenges.

Submission Should Include:

- **Executive Summary:** Highlight key findings and final model specifications.
- **Problem & Solution Summary:** Recap the problem, explain the chosen solution, and discuss its business impact.
- **Implementation Recommendations:** Outline key action items for stakeholders, including benefits, cost analysis, risks, and areas for further analysis.

File Submission Formats:

- Full Code version project: HTML format
- Low Code version project: PDF format
 - Report templates are not provided for the Capstone Project in order to encourage learners to apply their knowledge and insights gained over the past 11 weeks of the program while structuring their project submission based on their own understanding of the domain. However, a Sample Project is available within the course for reference while preparing the Capstone Project submission.

Final Submission Notebook Guideline:

After completing the Milestone Submission, it is entirely your choice whether to continue in the same notebook or use a different notebook for the Final Submission; however, the Final Submission notebook must comprehensively cover all Final Submission grading rubrics equivalent to 40 points.

[Live Presentation Slide Deck](#)

Recommended Slides:

1. Title Slide
2. Project Introduction
3. Problem Statement & Objectives
4. Data Overview
5. Exploratory Data Analysis
6. Data Pre-Processing
7. Modeling Techniques
8. Model Comparison
9. Final Model Proposal
10. Implementation Recommendations
11. Conclusion

Live Presentation Slide Deck Submission Guideline:

Whether you are working on the Full Code version or the Low Code version of the Capstone Project, all learners are required to submit the presentation slide deck through the respective submission link.

File Submission Formats:

- PPTX, PPT or PDF
 - Full Code version project:
 - Final Submission in the HTML format
 - Presentation Slide Deck in the PPTX, PPT or PDF format
 - Low Code version project: PDF file
 - Final Submission in the PDF format
 - Presentation Slide Deck in the PPTX, PPT or PDF format

You will find two separate submission links active on your dashboard under the Activities section: Final Submission and Live Presentation. Please ensure that you upload the required files to their respective submission links and not to the same one.

Live Presentation Details

- Format: One-on-one Zoom session with an evaluator.
- Duration: 15 minutes total.
 - 8-9 Minutes: Learner presents their slides.
 - 5 Minutes: Q&A session with the evaluator.
 - Final Minute: Feedback sharing.
- Guidelines: Learners must adhere to the allotted time to ensure an efficient and productive session.
- The Live Presentation is a mandatory individual assessment of the program. Therefore, each learner must join the Zoom session using the link available on their dashboard at the scheduled time. The presentation roster will be shared via email and Slack in the Live Presentation week. You will initially remain in the Zoom waiting room while the previous learner presents their slides. Once the presentation concludes and the learner exits the session, the evaluator will admit the next rostered learner to proceed.
- To be eligible for the Live Presentations, learners must submit all deliverables: 9 Quiz Assessments, the Food Hub Project, the Elective Project Assessment, the Milestone Submission, the Final Submission, and the Presentation slide deck.
- Once the Final roster is shared, no changes will be made to the schedule

Wishing all learners the very best for their Capstone Project! This is your moment to apply everything you've learned, push boundaries, and create something truly impactful. Embrace challenges as opportunities, stay curious, and trust in your abilities. Every great achievement begins with dedication and effort - give it your best shot, and success will follow. Go forth and make a difference! 🚀🔥
